# 1 Introduction

In just few months, the COVID-19 pandemic, caused by the novel coronavirus, has radically transformed the lives of people around the globe, including higher education students. Apart from the devastating health consequences on people directly affected by the virus, the COVID-19 pandemic has had major implications for the way higher education students live and work, affecting their physical and mental well-being in a profound way. To capture the immediate economic and social effects of this crisis, University of Ljubljana, Faculty of Public Administration (with international partners) launched a large-scale online survey across the world on 5 May 2020. Entitled **Impact of the COVID-19 Pandemic on Life of Higher Education Students**, the online questionnaire targets higher education students - on what student life looks like during the COVID-19 pandemic, including teaching and learning, social contacts, as well as how students are coping with the situation emotionally in different parts of the world. The first part of the survey was ended by 7 June 2020, while the second part started on 8 June 2020 and follow-up will run in July/August 2020. The majority of questions are based on “The European Students’ Union Survey (2020)”, while other questions are new or were adapted from other recent Covid-19 surveys (e.g. Living, working and COVID-19: First findings, 2020). A global comparative analysis will help us to create best recommendations for policymakers and higher education institutions on how students can be supported in such crises in different environments, such as economic, social, cultural, political and institutional.

The questionnaire was opened to any student across the globe, aged 18 and over, and recruited via announcements at numerous universities and students’ associations world-wide. The survey study was advertised via university communication systems as well as online forums (e.g., through virtual learning environments and academic Facebook/Twitter/LinkedIn/Instagram accounts). By 15 June 2020, 30,877 students from six continents, 100+ countries and 150+ universities took part in the survey. The survey will remain online over the next few months in order to capture even larger number of students and the final results will be presumably published by 30 September 2020.

In the following sections, the questionnaire, methodology, survey sample, survey implementation and global partners (of the first part) of the survey are described.

## 2 Questionnaire Design and Survey Implementation

The questionnaire titled **Impacts of the COVID-19 Pandemic on Life of Higher Education Students** composed of 39 questions that were divided into 7 sections as follows:

1. **Socio-demographic and academic characteristics** – 8 questions on socio-demographic and academic characteristics of students, e.g. country and institution of study in spring semester, level and field of study, study level, citizenship, age and gender.
2. **Academic life** – 12 questions on how the COVID-19 pandemic affected student's experiences with teaching (lectures and tutorials/seminars), supervisions/mentorships, assessment and workload, teaching and administrative support as well as student performance and expectations.
3. **Infrastructure and skills for studying from home** – 2 questions on conditions to study from home (workspace, equipment, internet connection etc.) and students' computer skills.
4. **Social life** – 2 questions on students' support network during the COVID-19 pandemic crisis and who they would first turn to in different situations.
5. **Emotional life** – 1 question on students' emotions since the outbreak of the COVID-19 pandemic.
6. **General circumstances** – 13 questions on worries, financial circumstances, support measures and behaviours.
7. **General reflections** – 1 question on general reflections regarding the COVID-19 pandemic.

At the end, the respondents had the option to leave their e-mail address in case they would like to receive the results of the survey.

The majority of questions based on The European Students' Union survey (2020) which targeted higher education students - on what student life looked like during the COVID-19 pandemic. The questions of our survey were partly adjusted and supplemented with selected elements that enabled the researchers to understand in detail some additional personal and financial circumstances as well as the perception of support measures and change of behaviour.

The questionnaire was at first designed in English – this version of the questionnaire can be found in the Appendix. In the next phase, the international research partners suggested translating it to local languages, so the survey was translated to 6 languages: Italian, North Macedonian, Portuguese, Romanian, Spanish and Turkish.

A set of filters and rooting was applied to the questionnaire in order to adapt the questionnaire to the particular situation of the respondents, i.e. new questions were offered in case of cancelation of on-site classes due to a COVID-19 pandemic, in case of paying tuition fees, receiving a scholarship etc.

The online questionnaire was made available to users via 1KA, which is an open source application that enables services for online surveys free of charge. The development takes place at the Centre for Social Informatics, at the Faculty of Social Sciences, University of Ljubljana, Slovenia. For data protection reasons the survey was open to people aged 18 or over and presently enrolled in a higher education institution. The participants were also informed on the voluntary and anonymous participation in the study.

### 3 Survey Sample and Methodology

By 15 June 2020, 30,877 students participated in the survey, coming from 129 countries, of which 13,610 (44.08 %) were from Europe, 7,306 (23.66 %) from Asia, 4,220 (13.67 %) from South America, 2,708 (8.77 %) from Africa, 2,419 (7.83 %) from North America and 186 (0.60 %) from Oceania. 428 (1.39 %) students didn't provide the information on the country. The response rate was 34.80 % (30,087 out of 88,716 who opened the link).

The participation was unequally distributed among world countries (Table 1). In particular:

- ▶ 1,000 responses or more were collected in 10 countries (Poland, Mexico, Italy, Chile, Turkey, India, Ecuador, Bangladesh, Portugal, Slovenia);
- ▶ more than 500 but less than 1,000 were collected in 6 countries (Romania, Croatia, Pakistan, Indonesia, Hungary, Ghana);
- ▶ more than 200 and less than 500 were collected in 19 countries;
- ▶ a total of 3,060 responses were collected from 93 countries with less than 200 responses.

The age of respondents varied from 18 to 70 years with mean age of 23.55 years with standard deviation of 5.55 years. Most of the respondents belonged to the age group between 20 and 24 years (54.86 %, i.e. 12,937 out of 23,582 who reported their age), followed by the age group under 20 years (26.88 %) and group between 25 and 30 years (9.84 %). The least frequent group of students was older than 30 years (8.43 %).

The main goal of weighting was to improve the quality and analytic strength of the survey data. For our purposes, we used post-stratification weights based on combinations of demographic characteristics (such as gender, age, level of study, field of study). For comparison of different countries and continents (or other geographical areas), we used population size weights (Bethlehem, n. d., European Social Survey, 2014)

The figures below show the distribution of basic demographic characteristics of our sample. Missing values are excluded from the plots, i. e. the relative frequencies sum up to 100 %.

In our sample, 30,442 respondents answered the question about their gender. Most of them were female (19,688, i.e. 64.67 %). The percentages for male students (10,375, i.e. 34.08 %) do not sum up to 100 % since 379 students, i.e. 1.24 %, are either gender diverse or preferred not to express their gender.

Figure 1: Gender distribution

In our sample, 30,350 respondents reported their student status. Most of them were full-time students (26,667, i.e. 87.86 %). The remaining 3,683, i.e. 12.14 % of students were part-time students.

Figure 2: Student status distribution

In our sample, 30,139 respondents reported their level of study. Most of them were a bachelor's degree (1st level) students (24,120, i.e. 80.03 %), followed by master's degree (2nd level) students (4,575, i.e. 15.18 %). The remaining 1,444, i.e. 4.79 % of students were PhD (doctoral degree (3rd level)) students.

Figure 3: Level of study distribution

In our sample, 29,785 respondents reported their field of study. Most of them were social sciences students (11,026, i.e. 37.02 %), followed by a group of applied sciences students (9,258, i.e. 31.08 %) and natural and life sciences students (6,470, i.e. 21.72 %). The least frequent group of students was from the field of arts and humanities (3,031, i.e. 10.18 %).

## APPENDIX: The Questionnaire

### IMPACTS OF THE COVID-19 PANDEMIC ON LIFE OF HIGHER EDUCATION STUDENTS

Dear Student,

University of Ljubljana from Slovenia (with international academic partners) is carrying out the global survey Impacts of the COVID-19 Pandemic on Life of Higher Education Students. The questionnaire is based on and extending The European Students' Union survey (2020) and targets higher education students - on what student life looks like during the COVID-19 pandemic, including teaching and learning, social contacts, as well as how students are coping with the situation emotionally.

Please, fill in this survey to help us understand the above aspects of your life. The participation in the study is voluntary and will help us to create recommendations for policymakers and higher education institutions on how students can be supported in such crises in different environments, such as economic, social, cultural, political and institutional. It should take about 15 minutes to fill in the questionnaire divided to 7 sections. The answers submitted will be anonymous. The collected data will be used just for purposes of the survey.

If you have any further questions please feel free to contact Professor Aleksander Aristovnik, PhD, from University of Ljubljana: [aleksander.aristovnik@fu.uni-lj.si](mailto:aleksander.aristovnik@fu.uni-lj.si).

By clicking on the **Next page** I hereby certificate that:

I was informed on the voluntary and anonymous participation in this study;

I am at least 18 years old;

I am presently enrolled in a Higher Education Institution.

Thank you in advance for participating in this study!

## S1 - SOCIO-DEMOGRAPHIC AND ACADEMIC CHARACTERISTICS

In this part of the questionnaire, we are interested in your socio-demographic and academic characteristics.
